

I am a listener and financial supporter of Airl Radio, a broadcaster based in California, heard on 93.7 FM in my area. The station provides contemporary Christian music that my entire family enjoys, and alerts us to concerts and events.

I am a Christian, and believe that spreading the gospel of Jesus Christ is of greatest importance. They also provide national news, of interest to anyone who might tune in.

Please do not reduce Airl's service with Low Power FM. Hundreds of thousands of people listen to Airl by FM translators. Many hundreds, and probably more, listen in our area. Without Airl and KLove, our area would not have this type of programming.

Airl encourages people to love one another, volunteer at rescue missions, help build orphanages and churches in Cambodia and other places. They have a prayer hotline staffed by pastors and counselors, and they have been actively and successfully involved in suicide prevention.
